# CLAUDE INTELLIGENCE HUB

## NAVIGATION GUIDE & OPERATIONAL ROADMAP

Doc. Ref: 02\_CIH-ROADMAP

Date: 2026-02-17

Classification: GENERAL ACCESS

Source: Magneto (Claude Code)

VERSION 1.0.0 // AUTHORIZED

# OPERATIONAL CATEGORIZATION

## CATEGORY A: MANDATORY

**The Rule: Install all five. Always.  
In sequence.**

- 1. jimmy-core-preferences
- 2. session-memoria
- 3. x-mem
- 4. gdrive-sync-memoria
- 5. claude-session-registry

## CATEGORY B: À LA CARTE

**The Rule: Install only upon  
operational requirement.**

- pbi-claude-skills
- context-guardian
- repo-auditor

*Internalize this distinction before proceeding.*

# OPERATIONAL PATHWAYS

**01**

**PATH:** Full Setup

**Target:** New User / Fresh Machine

**End State:** Production-ready.

**02**

**PATH:** Skill Discovery

**Target:** Existing User

**End State:** Full capability awareness.

**03**

**PATH:** Power BI Specialist

**Target:** Analyst (PBIP)

**End State:** 50–97% token savings.

**04**

**PATH:** Developer

**Target:** Contributor

**End State:** Governance & Release mastery.

**05**

**PATH:** Recovery

**Target:** Emergency

**End State:** System restoration.

# PROTOCOL 1: INITIALIZATION

## 1. Intelligence Gathering

- Read README.md and EXECUTIVE\_SUMMARY.md.  
**Critical:** Windows users must review WINDOWS\_JUNCTION\_SETUP.md.

## 2. Prerequisite Verification

- Git 2.30+ (git --version)
- Claude Code CLI (claude --version)
- OS Shell: PowerShell 5.1+ (Windows) or Bash 4.0+ (macOS/Linux)

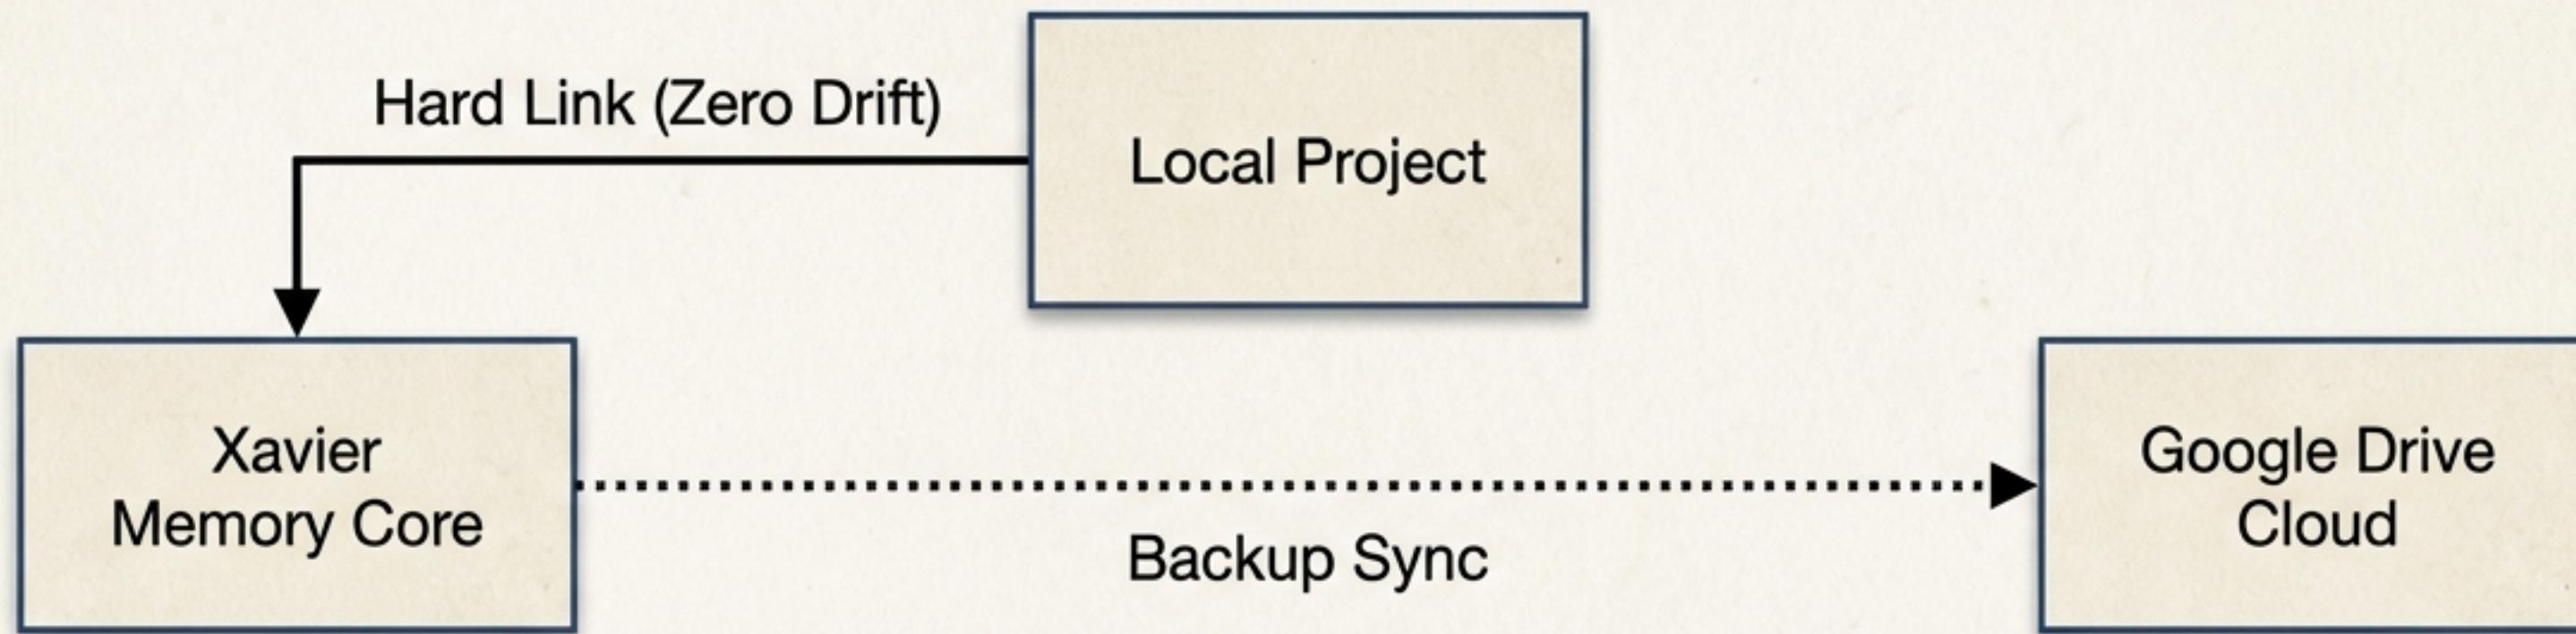

## 3. Acquisition

Clone repository to local environment.

## 4. Automated Deployment

- Action:** Execute setup script.  
**Duration:** ~15 Minutes.  
**Outcome:** Installs 5 mandatory skills & creates junction points.

# PROTOCOL 1: INTEGRATION & SYNC

## Step 5: Memory Link (Windows)

**Mechanism:** Creates hard links for xavier-memory/MEMORY.md.  
**Result:** One file accessible by all projects.

## Step 6: Cloud Redundancy

**Action:** Set up Google Drive Backup. Mandatory for ChatLLM Teams (ABACUS.AI).

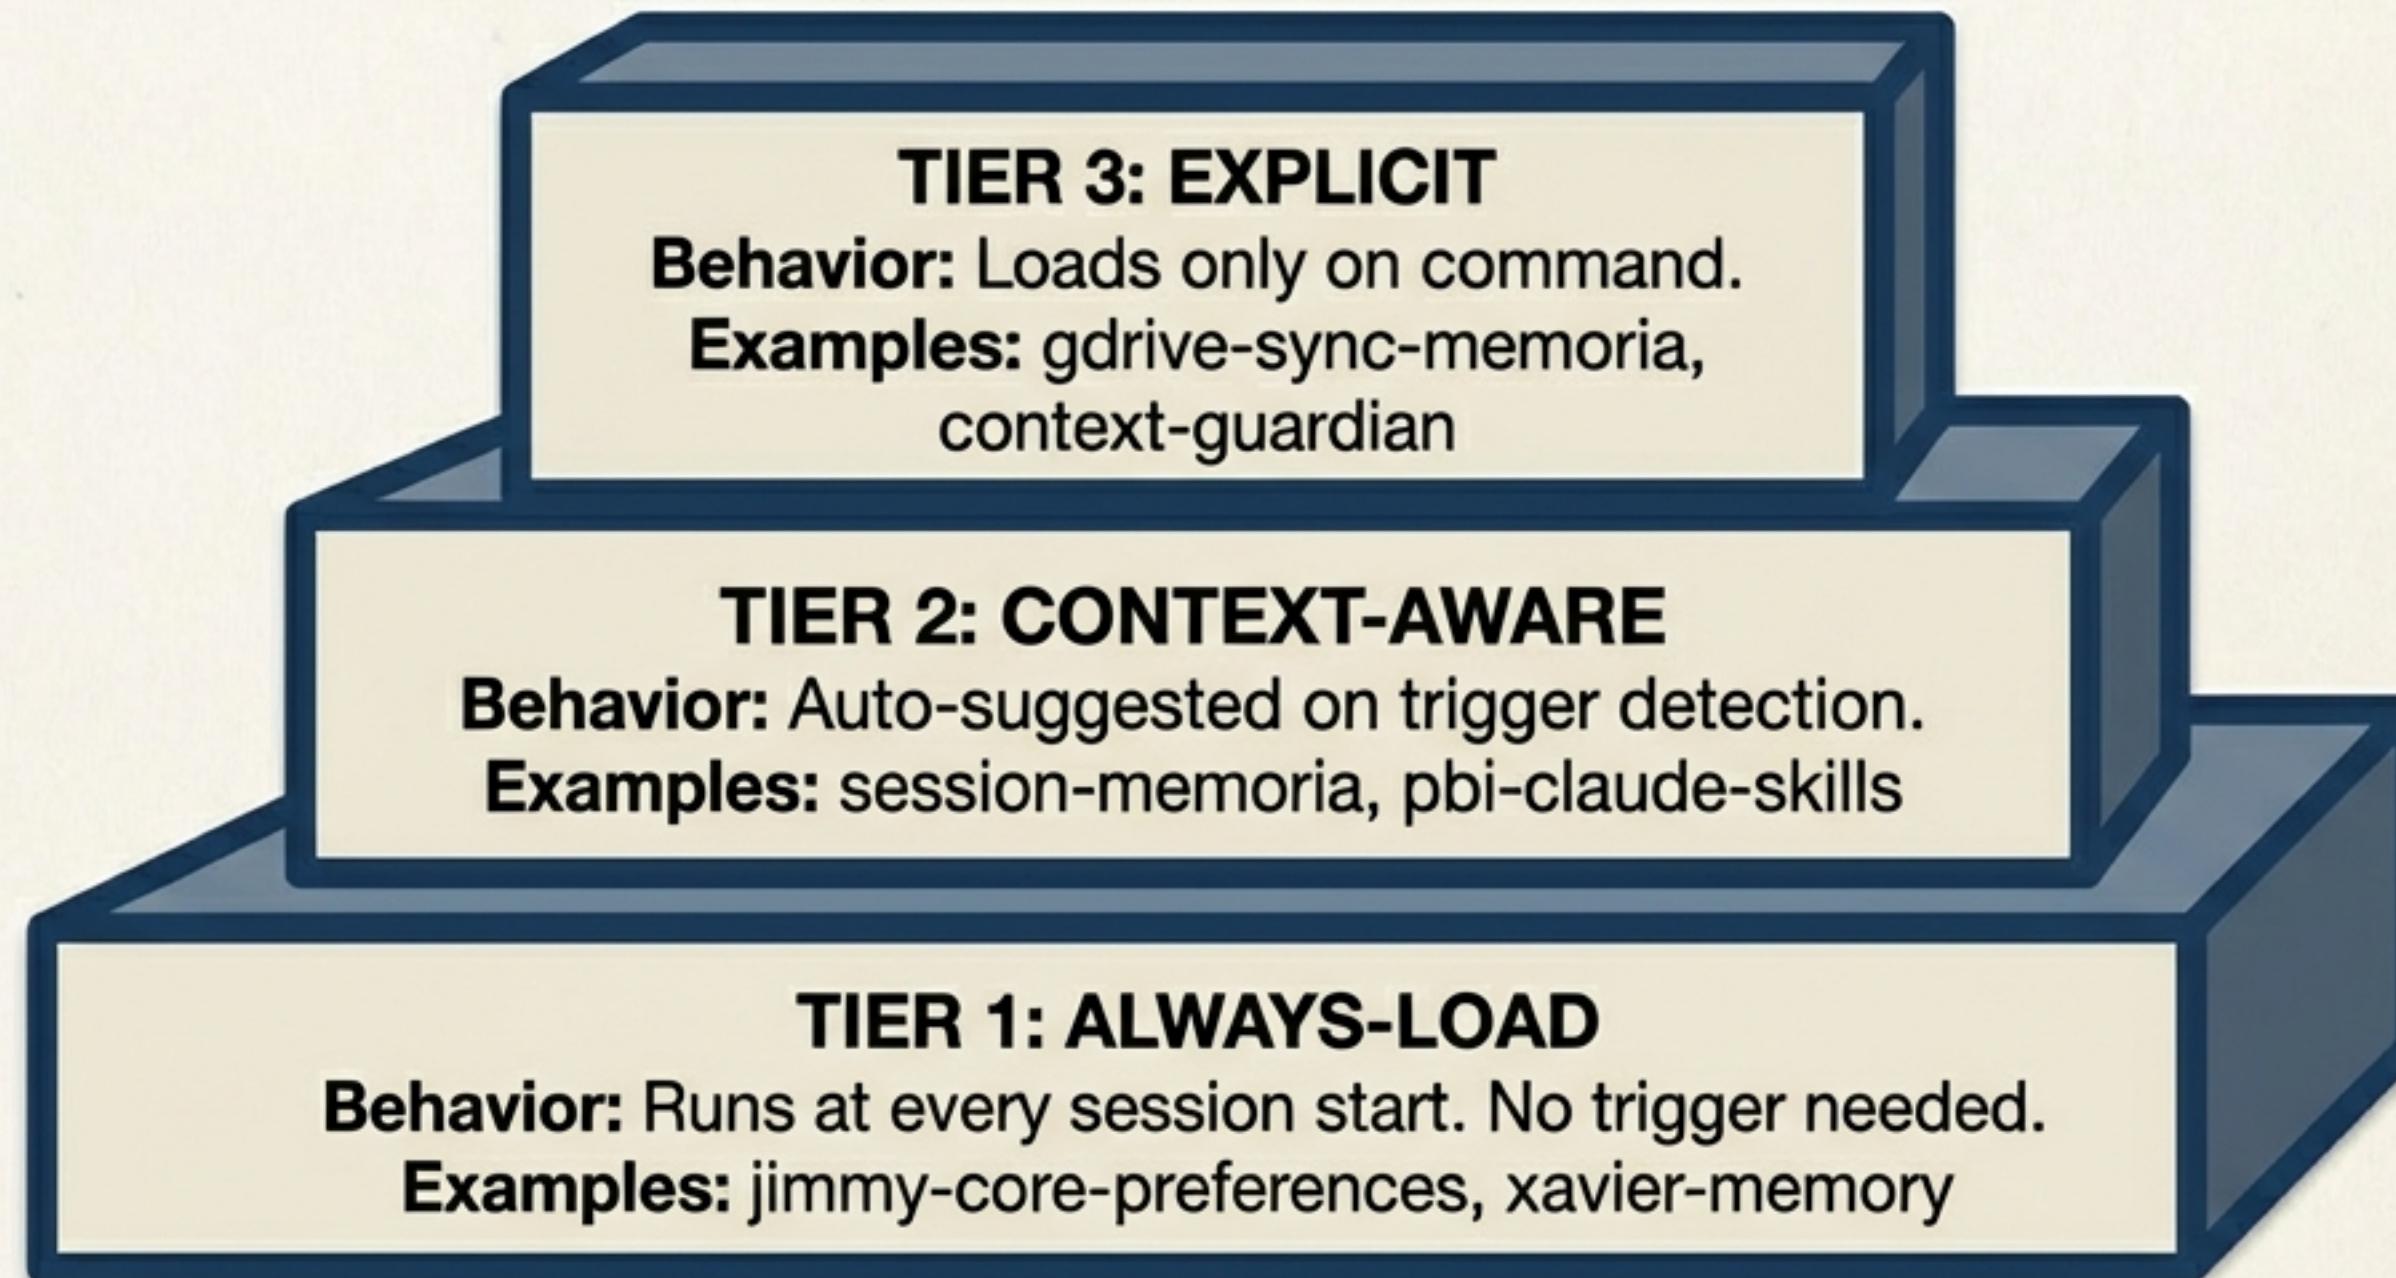

## Step 7: Session Start

**Action:** Open Claude Code. Auto-run initiates git pull and branch check.

PATH 1 COMPLETE  
PRODUCTION READY

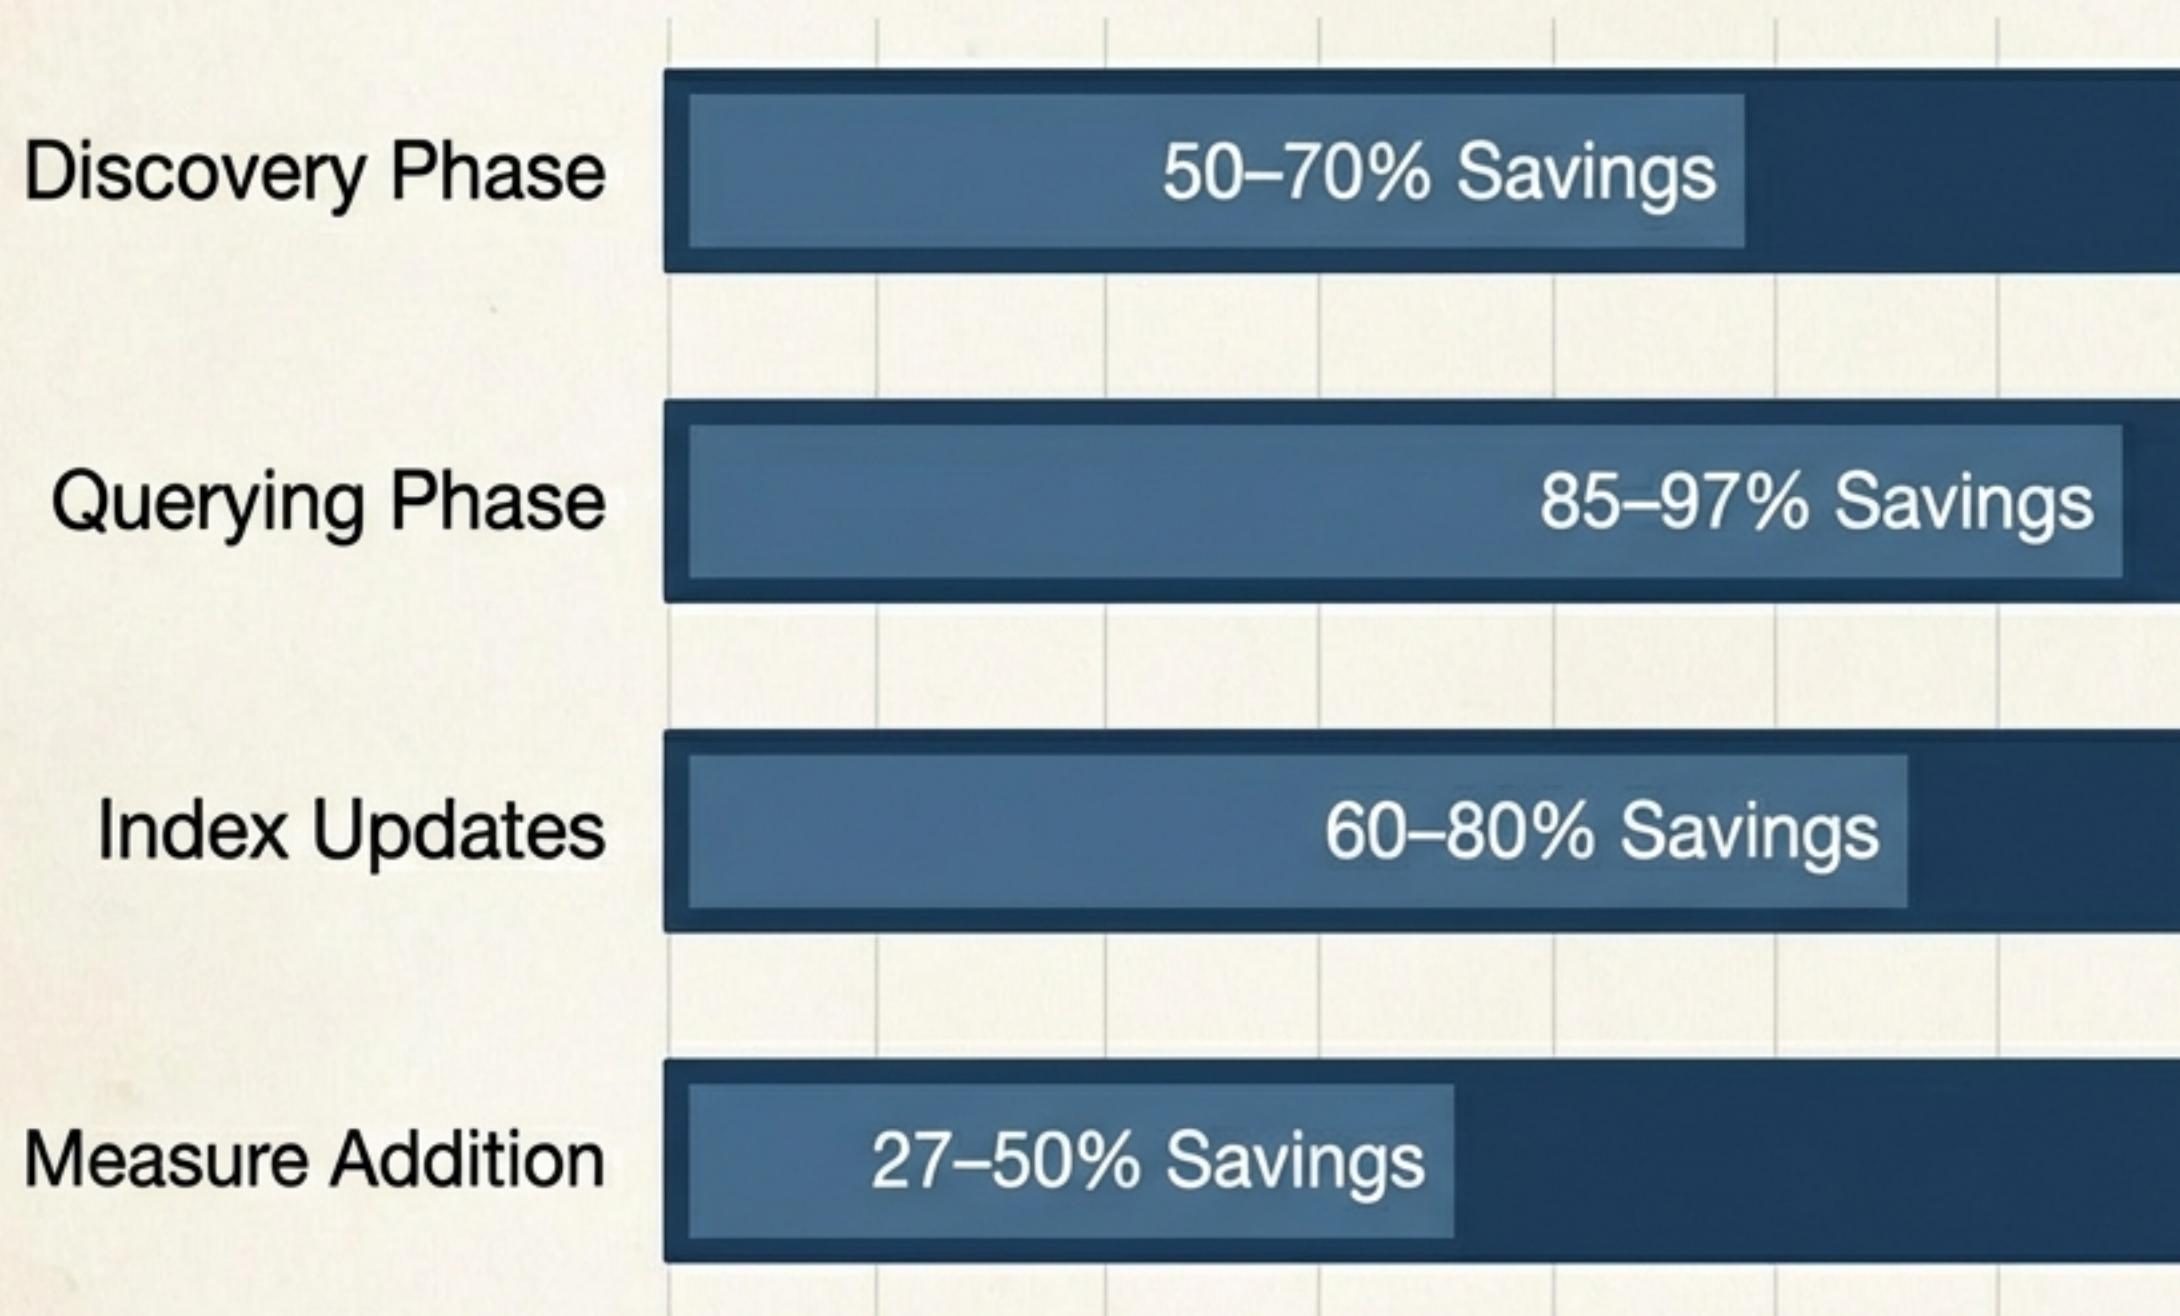

# PROTOCOL 2: SKILL INTELLIGENCE

## The Hub Map & Loading Tiers

# PROTOCOL 3: POWER BI OPTIMIZATION

**Objective:** Drastically reduce token costs for PBIP projects.

**Deployment Scope:**  
Project-Specific (Not Global).  
Installs directly into the PBIP  
PBIP project folder.

**Reference Files:** pbi-  
claude-skills/README.md

CONFIDENTIAL -  
DO NOT DISTRIBUTE

# POWER BI: COMMAND REFERENCE

<b>/pbi-discover</b>	Maps entire project structure.
<b>/pbi-query</b>	Queries tables, measures, and relationships (Max savings).
<b>/pbi-add-measure 'Name' 'DAX'</b>	Adds DAX measure with auto-validation.
<b>/pbi-index-update</b>	Regenerates POWER_BI_INDEX.md.
<b>/pbi-context-check</b>	Monitors context window usage.

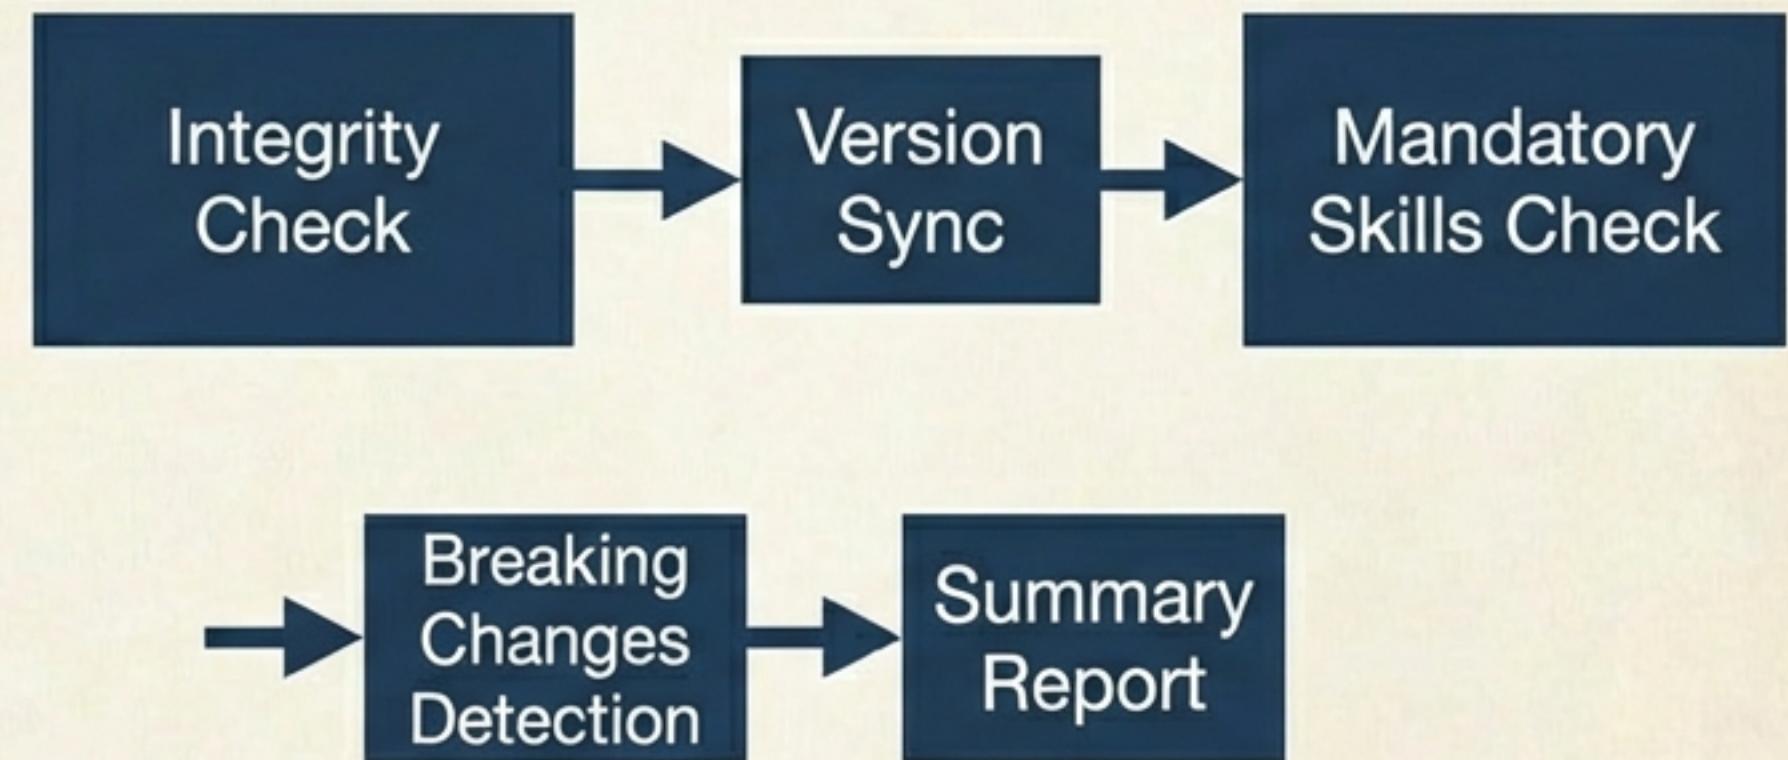

CONFIDENTIAL -  
DO NOT DISTRIBUTE

# PROTOCOL 4: GOVERNANCE ARCHITECTURE

## Standards

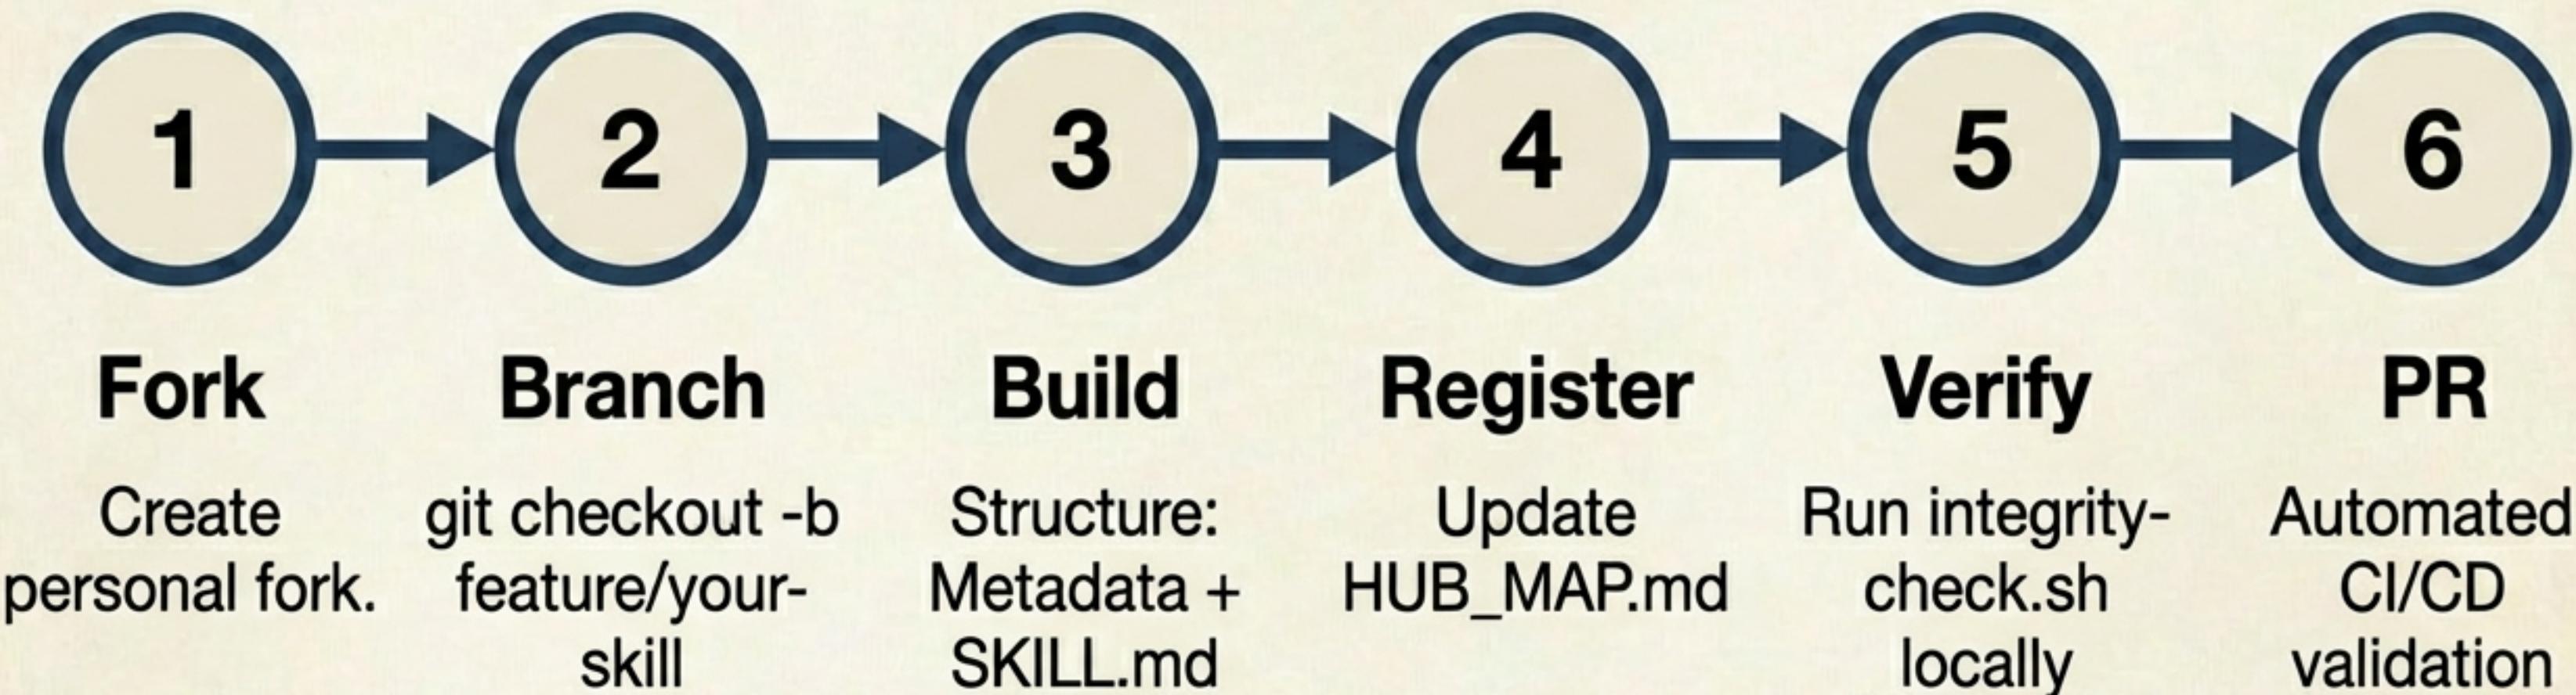

- **Token Economy:** Strict limits on file loading and response sizes (see budget-rules.md).
- **Release Validation:** Required docs/FEATURE\_RELEASE\_CHECKLIST.md.

## CI/CD Integrity Pipeline

CONFIDENTIAL -  
DO NOT DISTRIBUTE

# PROTOCOL 4: CONTRIBUTION CYCLE

CONFIDENTIAL -  
DO NOT DISTRIBUTE

# PROTOCOL 5: DIAGNOSTICS MATRIX

**Core Principle:** Diagnose first, act second.

SYMPTOM	DIRECTIVE
Skills not loading / Broken Junctions	Fix Junctions (Step 5.A)
MEMORY.md missing	Restore Memory (Step 5.B)
New Machine Setup	Bootstrap Magneto (Step 5.C)
Account Switch	Global Config Backup (Step 5.D)
CI/CD Failure	Script Validation (Step 5.E)

CONFIDENTIAL -  
DO NOT DISTRIBUTE

# PROTOCOL 5: RECOVERY PROCEDURES

## Emergency Card 5.A Junctions

Verify via scripts/integrity-check.sh.

## Emergency Card 5.B Memory Restore

Command: 'Xavier, restore memory'. Select from local or Google Drive backups.

## Emergency Card 5.C New Machine

Follow Path 1. Run bootstrap-magneto.ps1 from GDrive.

## Emergency Card 5.D Account Switch

Backup global config. Run bootstrap-magneto.ps1 --fix-symlinks.

## Emergency Card 5.E CI/CD Fixes

Run scripts/sync-versions.sh. Verify mandatory metadata.

CONFIDENTIAL -  
DO NOT DISTRIBUTE

## APPENDIX A: GLOSSARY

### Junction Point

Windows directory link keeping installed skills auto-synced with the repo.

### Hard Link

NTFS link ensuring MEMORY.md is identical across all projects (zero drift).

### Golden Close

Mandatory 7-step end-of-session checklist: Sync, HUB\_MAP check, Git status, Changelog, Backup, Push, Summary.

### Ciclope Rules

Routing enforcement protocols in jimmy-core-preferences to block duplicates and maintain integrity.

# SYSTEM STATUS: OPERATIONAL

Documentation Complete. You are authorized to  
navigate the Claude Intelligence Hub.
